TEST PLAN DOCUMENT

Fashion Store Mobile Application

1. Document Information

Item	Details
Project Name	Fashion Store Mobile Application
Document Name	Test Plan
Version	1.0
Prepared By	Tishany T.
Role	Manual QA Tester
Application Type	Mobile Application
Platform	Android
Date	14 April 2026

2. Objective

The objective of this test plan is to define the testing approach, scope, resources, and schedule for the Fashion Store Mobile Application. This document ensures that all customer-side functionalities of the mobile application work as expected and meet the specified requirements.

3. Application Overview

The Fashion Store Mobile Application is a customer-side e-commerce application developed using Flutter with Firebase Authentication and Cloud Firestore as backend services. The application allows users to register, log in, browse fashion products, manage shopping carts, place orders, view order history, and manage user profiles.

4. Scope of Testing

4.1 In Scope

- User Registration
- User Login and Logout
- Product Browsing
- Product Search
- Product Details Viewing
- Shopping Cart Management (Add / Remove / Update items)
- Checkout and Delivery Details
- Order Placement
- Order History Viewing
- User Profile View and Update
- Session handling and access control

4.2 Out of Scope

- Admin panel functionalities
- Performance and load testing
- Security penetration testing
- Payment gateway integration
- iOS platform testing

5. Testing Types

- Manual Functional Testing
- UI Testing
- Smoke Testing
- Regression Testing
- Retesting

6. Test Environment

Component	Details
Mobile Platform	Android
Device	Android Emulator / Physical Device
Frontend	Flutter
Backend	Firebase
Authentication	Firebase Authentication
Database	Cloud Firestore
Network	Internet connection

7. Test Approach

Testing will be conducted manually by executing predefined test cases based on the application requirements and use case diagram. Each test case will be executed step-by-step, and results will be compared against expected outcomes. Defects identified during testing will be logged, fixed, retested, and closed accordingly.

8. Entry Criteria

- Application build is available
- Functional requirements are finalized
- Test scenarios and test cases are prepared

9. Exit Criteria

- All planned test cases are executed
- All critical defects are fixed and closed
- Final test execution summary is prepared

10. Roles and Responsibilities

Role: Manual QA Tester

Responsibilities:

- Prepare test plan, test scenarios, and test cases
- Execute test cases on the mobile application
- Identify and report defects
- Perform retesting and regression testing
- Prepare test execution summary and QA sign-off

11. Test Deliverables

- Test Plan Document
- Test Scenarios Document
- Test Case Document (with execution results)
- Defect Report
- Traceability Matrix
- Test Execution Summary & QA Sign-Off Document

12. Risks and Mitigation

Risk	Mitigation
Firebase configuration issues	Retesting after configuration fixes
Emulator performance issues	Use physical Android device
Real-time data update delays	Verify Firestore listeners and retest

13. Test Schedule

Activity	Duration
Test Planning	1 Day
Test Scenario Preparation	1 Day
Test Case Preparation	2 Days
Test Execution	3 Days
Defect Fixing & Retesting	2 Days
Final Reporting	1 Day

14. Approval & Sign-Off

Tested and Approved By:

Field	Details
Name	Tishany T.
Role	Manual QA Tester
