Test Execution Summary & QA Sign-Off

Fashion Store Mobile Application

1. Document Information

Item	Details
Project Name	Fashion Store Mobile Application
Document Name	Test Execution Summary & QA Sign-Off
Version	1.0
Prepared By	Tishany T.
Role	Manual QA Tester
Application Type	Mobile Application
Platform	Android
Date	14 April 2026

2. Introduction

This document provides a summary of the manual testing activities performed for the Fashion Store Mobile Application.

It includes test execution results, defect status, coverage details, and the final QA sign-off decision based on the current state of the application.

3. Test Scope Summary

Testing was conducted for the customer-side functionalities of the mobile application developed using Flutter with Firebase Authentication and Cloud Firestore.

Modules Covered

- User Registration
- User Login & Logout
- Product Browsing & Search
- Product Details
- Shopping Cart Management
- Checkout & Order PlacementOrder History
- User Profile
- Session & Access Control

4. Test Execution Summary

Metric	Count
Total Test Scenarios	27
Total Test Cases	26
Test Cases Executed	26
Test Cases Passed	24
Test Cases Failed	2

- Majority of the application functionality is working as expected.
- Two test cases remain failed due to unresolved defects.

5. Defect Summary

5.1 Overall Defect Status

Defect Status	Count
Total Defects Identified	5
Closed Defects	3
Open Defects	2

5.2 Defect Details

Defect ID	Description	Status
FS_DEF_01	Password visibility not working	Closed
FS_DEF_02	Update cart quantity not working	Closed
FS_DEF_03	Remove cart item not working	Closed
FS_DEF_04	Cart not cleared after successful order	Open
FS_DEF_05	Profile image update/loading issue	Open

- Closed defects were fixed by the developer and successfully retested.
- Open defects are still reproducible and require further development fixes.

6. Retesting & Regression Testing

- Retesting was performed for all fixed defects.
- Related test cases were updated to Pass with defect IDs retained for traceability.
- Regression testing confirmed that:
 - Cart quantity update
 - Cart item removal
 - Password visibility toggle
 did not introduce new issues in related functionalities.

7. Traceability Confirmation

- All requirements are mapped to test scenarios and test cases.
- A Requirement Traceability Matrix (RTM) confirms full functional coverage.
- One feature (Profile Image Update) is marked as partially covered due to an open defect.

8. Outstanding Risks

The following risks remain due to unresolved defects:

Risk	Impact
Cart not cleared after order	May cause duplicate orders or user confusion
Profile image update not working	Incomplete user profile experience

- These issues should be addressed before production deployment.

14. Approval & Sign-Off

Tested and Approved By:
